

CeDeL Solutions will be at PTC/User 2009

We are excited to announce that once again CeDeL Solutions will have a booth at PTC/User in order to answer your questions and discuss any requirements you have for Routed Systems. Come by and say hello at booth 406. We are especially interested in customer requirements and procedures for the use of the central catalog tool in Routed Systems Designer. We are also offering a free gift for our CeDeL Solutions existing customers who give us a video testimonial, come and find us at the booth to give your opinion. Cassandra DeLeon Kemp will also be presenting a paper on Central Catalogs in RSD.

PTC/User World Event

PTC/User World Event (June 7-10 2009) is an excellent chance for users of PTC software to come into contact with other users, PTC employees and exhibitors who provide hardware, software and services for PTC users. This year the World Event is being held at Orlando, Florida. Registration is still open for the event so don't delay in signing up! Expert presentations

Cassandra DeLeon Kemp from CeDeL Solutions will be presenting a paper "An Administrator's Perspective on Central Catalogs for RSD Designs and Pro/DIAGRAM Imports", details can be found [here](#). The presentation is on Tuesday from 3:50 PM to 4:35 PM. The presentations cover all aspects of PTC software and are truly exemplary. They are given by expert users, PTC staff and exhibitors. In 2006 and 2007 Cassandra DeLeon Kemp presented papers for CeDeL Solutions on Routed Systems Designer and Pro/Cabling. User experience evaluations

PTC will also be holding User Experience Evaluations (formerly usability labs) so that you can get hands-on experience with up and coming versions of PTC software and provide feedback to the team. Customer testimonials

Are you a CeDeL Solutions customer? We want your testimonials! Come by our booth and leave a personal video testimonial and we'll give you a free gift. Feedback on RSD

CeDeL Solutions is interested in obtaining feedback from users of the new releases of Pro/Engineer and especially Routed Systems Designer (RSDesigner). We are developing procedures for editing and administering the central catalog in RSDesigner with a view to automating that procedure. We're looking forward to seeing you at booth 406.
